Next Leaders' Africa Summit (Virtual) 2020

August 28-29, 2020

Exponential Change - Transforming Africa in a Decade!

The **population of Africa** is projected to increase to **around 2.5 billion in 2050, and possibly 4.5 billion in 2100** (compared to 1.27 billion in 2019/UN 2017 projections). All key sustainability challenges, social as well as environmental, will be on full display in Africa in the decades to come, and **the most vulnerable people are likely to suffer the brunt of negative future impacts** (food, water, and resource constraints, conflicts, climate change impacts, migrant flows, etc.).

At the same time, **Africa has the youngest population of any continent on Earth**, with an **amazing amount of entrepreneurial energy** and hope for the future. Business opportunities abound across the continent, but they will have to be explored in sustainable way and, hopefully, in collaboration with and **lead by a new generation of sustainably and socially literate leaders**.

The years between now and 2030 are critical for building an Africa that will not only survive but excel.

The **Next Leaders' Africa Summit 2020** (virtual) will explore ways **African youth** can collaborate to **take sustainable action** towards transforming the continent. Also, the **One Million Leaders Africa Program (OMLA)** will be launched during the summit.

Summit Program

DAY ONE 2020.8.28 (Friday) (Time is WAT)
